SUBJECT: Notice of Fifth Meeting
Workgroup for Operational Rules for Public Water Systems

On November 7, 2001, the Indiana Department of Environmental Management Drinking Water Branch and stakeholders held their fourth meeting concerning the development of a new rule regarding the operation of public water systems treatment and distribution systems. The purpose of this rulemaking is to develop a set of standards for the operation and maintenance of water treatment plants and distribution systems. The rules will be designed to ensure facilities operate in a manner that protects human health.

You are invited to attend the next meeting to continue developing a strategy regarding Operational Rules for Public Water Systems. We are holding this meeting in conjunction with the Indiana Rural Water Association Water Institute. We are anticipating a good turn out of operators of small systems.
